Hawaiian Gazette

10-PAGE EDITION. TUESDAY, OCT. 20, 1891.

On Sunday week a most villainous attempt was made to wreck the steam plant of the new electric light and motor company by putting obstructions in the steam pump.

It is understood on the basis of unofficial reports from Washington, says Bradstreet, that among other things the administration has under consideration the acquisition of the island of St. Thomas, in the West Indies, which now belongs to Denmark, as a naval station.

It is understood on the basis of unofficial reports from Washington, says Bradstreet, that among other things the administration has under consideration the acquisition of the island of St. Thomas, in the West Indies, which now belongs to Denmark, as a naval station.

To day's edition of the DAILY ADVERTISER is somewhat larger than usual—one hundred quires, or 2,400 copies—as we intend to circulate it throughout the city, country and the islands wherever no paper is taken; and we shall be prepared to issue a large edition whenever the demand calls for it.

There is now no doubt whatever whence come the rumors set about in Washington about Hawaii. The Philadelphia Press and the New York Evening Post plainly quote Moreno as the agent of the National party of Hawaii, and author of information furnished to the press about Hawaii.

In Kaloa, September 18, we find in large capitals "A Regent Needed. In anticipation of coming events," etc. Again, "Her Majesty, under advice of physicians, will not live much in the Palace; her health has improved since she retired to her private residence."

These are the rags from which Moreno fabricates his falsehoods, and they all emanate from only one source. The following note from Dr. Trossman is plain, and to the point:

Mr. Enton—Dear Sir: I think it is my duty to give the most emphatic denial to the crowd and circulated article concerning Her Majesty in the San Francisco Examiner of October 6.

on horseback almost every day, some ill-winded people might say that there is some foundation in the article mentioned.

THE CENSUS—SECOND NOTICE.

One of the most important points in a national census is the relative proportion; in Hawaii, we are afraid it must be spoken of as disproportion, of the sexes.

On page 23 is a table showing the numbers of either sex at the time of five enumerations, from 1836 to '90 inclusive. During this period the number of females as compared to males has been practically stationary—as to native, at about 46.7 and half-caste at 53.05; Hawaiian-born foreign from 51.25 in 1872, when they were first returned separately, to 47.53 last year.

The returns of occupations furnish many interesting, and not a few unexpected results. Of 25,466 males and females returned as "laborers," in which classification, the Superintendent explains, are included plantation "hands" and unskilled labor of all kinds, the natives and half-castes only supply 9.30 per cent., the Portuguese 10.42, the Chinese 34.66, and the Japanese 45.07, leaving only 2.54 per cent. to be made up from other nationalities.

Of 2,802 mechanics and skilled laborers, the six principal nationalities take the following order in point of number: Hawaiians, Chinese, Americans, British, German and Portuguese.

The marriage statistics, on page 22, show that, of all above 15 years of age, 52.34 per cent. of the native men and 67.86 of the native women are or have been married; half-caste, male 48.90 and female 54.21 the same. The highest figure in this table shows that 93.29 per cent. of Japanese females and 129.07 Japanese males are married; 90 per cent. of Portuguese women are married.

Of mixed marriages only 4.45 per cent. of Hawaiian women are married to foreigners, being in number 600, or 7.1-5 per cent. of the Hawaiian married women.

In dealing with educational statistics we omit Chinese, Japanese, Polynesian and some European nationalities, whose numbers are too small to record here, though the superintendent has classified them all.

The percentage of individuals above 6 years old and able to read and write Hawaiian, English or some European language, is as follows in order of merit, viz: Americans 93.04, British 91.60, Germans 89.88, half-castes 83.05, Natives 79.80, Hawaiian born foreigners 52.12. Percentage of school age attending school runs from the maximum of 94.57 of half-castes to the minimum of 61.50 Hawaiian-born foreigners.

Now, including those hitherto omitted, there are in the Kingdom, altogether, 78,671 persons over 6 years of age, and the percentage able to read and write is 48.55. There are 12,069 children of school age, of whom 81.59 per cent. are attending school.

The table of nationality of teachers shows 116 natives and half-castes, 73 American, 36 British and seven others. The plantation and customs statistics may be found in the respective published reports and collected in annuals and guide books.

The Superintendent of the Census has collected a considerable amount of new and valuable information, and accompanied it with an intelligent commentary in his remarks on and explanations of each table.

FOREIGN.

An attempt on the life of the Emperor of Austria is reported from Vienna. On October 1st the Emperor arrived in safety at Reichenberg near Prague.

It is said that a dynamite shell was placed on the railroad bridge of Rosenthal, a suburb of Reichenberg, shortly before the Emperor's train was to have passed over the bridge. Some watchmen saw the would-be assassins and frustrated their design.

Two bombs were discovered fitted with time fuses, but either the time for the imperial train was not understood by the plotters, or the length of fuse miscalculated, for one shell burst long before the train was due and destroyed some of the masonry and roadbed, but did not injure the structure of the bridge. No arrests have been made, but the general feeling is one of indignation, and the Emperor was warmly received by the people of

Reichenberg, the Burgomaster presenting an address of congratulation.

General Boulanger committed suicide by shooting himself through the head on the grave of his mistress, Mme. de Soubert, at Brussels on September 30. The General's friends state that since the death of Mme. de Soubert he had frequently expressed a desire for death, and had even several times attempted to take his own life.

George Ernest Jean Marie Boulanger was born at Rennes in 1837, his father being a country lawyer and his mother, who is still living, was a Welsh lady whose maiden name was Griffith. On passing out of the military school of St. Cyr, in 1855, he served in the Kabyle campaign and afterwards in the Franco-Italian war, where he was wounded. He next served in Cochinchina, and just before the war of 1870 became a major and was with Bazaine at Metz, but by some means made his escape and found his way to Paris, where he fought under the Government of National Defense, and was twice wounded, mentioned for bravery and made Commander of the Legion of Honor. In 1883 he became Brigadier-General, and for a time held command of the army of occupation of Tunis. In 1886 he became Minister of War. After his removal from this post, the General became notable as a political leader. A so-called "Patriotic League" of which he was the head, having been suppressed, he was tried by the Senate for having, while Minister of War, appropriated 250,000 francs of public money for the purposes of his own propaganda. He fled to Belgium and then to London, and resided for a time in Jersey. Finally, on permission, he took up his abode in Brussels, where he ended his career.

The U. S. S. Alert arrived at Yokohama from Ootolaska in twenty-four days, including a call at Kamshatka. She will reinforce Admiral Belknap's Squadron, and, being of light draught, will be very valuable if required for service up the Chinese rivers.

The Illustrated Tourist's Guide. That popular work, "The Tourist's Guide Through the Hawaiian Islands," is meeting with a steady sale both at home and abroad. Tourists and others visiting these islands should be in possession of a copy of it. It is a perfect mine of information relating to the scenes and attractions to be met with here. Copies in wrappers can be had at the publication office, 40 Merchant street. Price 61 cents.

"German Syrup" Martinsville, N.J., Methodist Parsonage. My acquaintance with your remedy, Boschee's German Syrup, was made about fourteen years ago, when I contracted a Cold which resulted in a Hoarseness and a Cough which disabled me from filling my pulpit for a number of Sabbaths. After trying a Physician, without obtaining relief—I cannot say now what remedy he prescribed—I saw the advertisement of your remedy and obtained a bottle. I received such quick and permanent help from it that whenever we have had Throat or Bronchial troubles since in our family, Boschee's German Syrup has been our favorite remedy and always with favorable results. I have never hesitated to report my experience of its use to others when I have found them troubled in like manner."—REV. W. H. HAGGARTY, of the Newark, New Jersey, M.E. Conference. A Safe Remedy. April 25, '90.

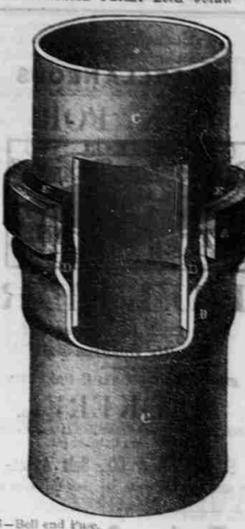

G. G. GREEN, Sole Man'fr, Woodbury, N.J.

RUPTURE. The only safe and certain cure for Hernia, Strain, and all other forms of Rupture. This Celebrated Preparation has been used for many years and has cured thousands of cases of Rupture. It is an Electric Truss, the only one of its kind, and is the only one that can be worn in any position, and is the only one that does not injure the organs, and is the only one that is safe and certain.

THE DAILY P. C. ADVERTISER AND WEEKLY GAZETTE. Are the Leading Newspapers in the Kingdom, AND HAVE THE LARGEST CIRCULATION.

NEW ADVERTISEMENTS.

RISDON IRON WORKS, SAN FRANCISCO, BUILDERS OF IMPROVED SUGAR MACHINERY OF ANY STYLE OR CAPACITY.

WROT IRON and STEEL RIVETED PIPE. The Largest Manufacturers—over 250 Miles Made, varying from 6 inch to 6 feet in diameter.

Matheson Patent Lock Joint Pipe!

SIMPLEST, CHEAPEST AND BEST FOR ALL PURPOSES.

THE MATHESON JOINT is made by enlarging or boring one end of the wrought iron tube (as shown in the cut), thereby requiring ONE HALF THE LEAK OF ANY OTHER PIPE JOINT—and one half the chance of leakage.

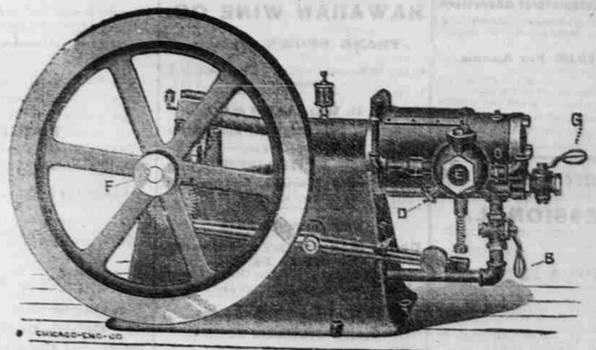

THE PIPE is made of any thickness necessary for the desired pressure or head—and COATED WITH ADAMANTINE, CALOMINED, OR GALVANIZED.

Elbows, Tees, Gates, and all Fittings, SUPPLIED FOR THE SAME.

For further particulars, apply to JOHN DYER, Room 11, Spreckels Block.

No Steam! No Fire! No Boiler! No Danger!

REGAN VAPOR ENGINE!

The above cut is an excellent illustration of our Horizontal Engines which we manufacture in sizes from 3 to 20 Horse Power, and are adapted for Pumping, Electric Lighting, Lunning, Elevators, Harvesting and Thrashing Machines, Printing Presses, Boat and Shoe Machinery, Circular, Band and Jig Saws, Hoisting, Mill and Mining Machinery, Coffee Mills and Roasters, Polishing and Fanning Machines, Ventilating Apparatus, Emery Wheels, etc.; in fact everywhere power is needed.

The REGAN VAPOR ENGINES having more than realized the anticipations of purchasers, we have now the pleasure to submit Local References.

MR. JOSEPH TENNEY: DEAR SIR—I purchased from you one of your 2 Horse-Power HORIZONTAL REGAN VAPOR ENGINES, and after four months' trial it has worked in every way most satisfactorily. The Engine making 200 Revolutions and running a Rotary Pump with a belt making 150 Revolutions without any effort. It is delivering the water with great force 43 feet above, at the rate of 30 gallons per minute, or 1,800 gallons per hour. It is run by the yardman, and he finds no trouble whatever in running it. It is doing everything that was claimed for it, and I should consider it a very Handy, Safe and Simple Engine for anyone to run who is not an engineer, and therefore recommend these engines to anyone.

Illustrated Catalogues can be had and the Engine can be seen running in full operation at the CITY MEAT MARKET, Nuuanu street. JOS. TINKER, Sole Agent FOR THE HAWAIIAN ISLANDS.

THE RISDON Iron and Locomotive Works.

San Francisco, California. President F. B. TAYLOR, Vice-President J. S. MOORE.

Builders of Steam Machinery

Steamboat, Steamship, Land Engines & Boilers High Pressure or Compound. STEAM VESSELS of all kinds built complete, with hulls of wood, iron or composite. ORDINARY ENGINES compounded when advisable. STEAM LAUNCHES, Barges and Steam Tugs constructed with reference to the trade in which they are to be employed. Speed, tonnage and draft of water guaranteed. SUGAR MILLS and Sugar Making Machinery made after the most approved plans. Also, all Boiler Iron Work constructed therewith. WATER PIPE, of Boiler or Sheet Iron, of any size, made in suitable lengths for connecting together, or Sheets rolled, punched and packed for shipment, ready to be riveted on the ground. HYDRAULIC RIVETING, Boiler Work and Water Pipes made by this establishment, riveted by hydraulic riveting machinery, that quality of work being far superior to hand work. SHIP WORK, Ship and Steam Caps, Steam Winches, Air and Circulating Pumps, made after the most approved plans. SOLE Agents and Manufacturers for the Pacific Coast of the Marine Safety Boiler.

FUMPS—Direct Acting, Pumps for irrigation or city works' purposes, built with the celebrated Jovy Valve Motion, superior to any other pump. JOHN DYER, Honolulu. Room No. 2, upstairs, Spreckels' Block. 2901 1891.

CASTLE & COKE. HARDWARE,

Shipping and Commission Merchants. IMPORTERS AND DEALERS IN GENERAL MERCHANDISE.

Plantation Agents. Life, Fire and Marine. WITH INSURANCE AGENTS.

1882 HONOLULU, H. I. 2804-g
